

# PARAM SHAH

## FLUTTER DEVELOPER

### ABOUT ME

A junior Flutter developer passionate about turning ideas into elegant, high-performance mobile apps. I've worked across Flutter, Compose Multiplatform, Django, Supabase and Drift—building smooth, scalable products with clean UI, fast performance, and maintainable architecture. Always learning, always shipping.

### EDUCATION

**Bachelor of Engineering (CSE)**  
Lok Jagruti Kendra University,  
Sarkhej  
CGPA – 9.16  
2021 – 2025

**High School Education (10th & 12th)**  
Hebron Secondary & Higher  
Secondary School  
Completed 10th in 2019, 12th in 2021

### SKILLS

Flutter  
Firebase  
Supabase  
Razorpay  
Github  
Python  
Drift

### TOOLS

Android Studio  
VS Code

### LANGUAGE

- English
- Gujarati

### PROJECTS

- YVB Catalog** *October - Present 2025*
    - A client project built for Yogeshwar Vasani Bhandar, a kitchenware retail brand. Developed using Flutter, the app offers a fast, modern, and completely offline catalog browsing experience.
  - Notes | Flutter** *August - September 2025*
    - A clean, fast Flutter app for simple notes and to-dos. Create, edit, and delete timestamped notes, manage to-do lists with check/uncheck and swipe-to-delete, and multi-select for quick cleanup. Works fully offline with local data storage via Hive.
  - LitRate | Compose Multiplatform** *June - July 2025*
    - A sleek cross-platform book discovery app built with Compose Multiplatform. Browse titles, view ratings and details, and enjoy a smooth unified experience across Android, iOS, and desktop using shared Kotlin logic with MMVM and RESTful API.
  - Ezee Shopping | Python, Flask** *BTECH 2024*
    - Implemented a full stack Ecommerce website using Flask Framework. It is like Amazon and Flipkart.
- May 2025 - Present*

### EXPERIENCE

- Freelance Flutter Developer | Remote**  
<https://play.google.com/store/apps/developer?id=SkiaTech>
  - Worked as a freelance Flutter developer, building cross-platform mobile applications for clients and personal product launches.
  - Developed smooth, scalable UIs, integrated real databases like Supabase and focused on clean architecture, performance, and user-friendly design. Delivered multiple apps from concept to deployment, handled client feedback, and continued improving features across releases.
- Amri Systems | Web Development**  
<https://www.amrisystems.com/>
  - Contributed to the development of real-world web applications including Pretty Little Arts and MKMP (Mera Kaam Meri Pehchaan) using Django, Firebase, and modern web stacks.
  - Spread the development of a native-platform mobile application, improving app performance by 30% and reducing crash rates.
  - Integration of the Razorpay payment gateway
